

**Job Title: Senior Engagement Advocate**

Location: Essex, VT

Employer: EQUITAS Life Sciences, LLC

Contact: send résumé to [info@equitasls.com](mailto:info@equitasls.com)

**Job Duties:**

- Conduct primary and secondary research on human diseases, their causes and treatments, to develop strategic and tactical recommendations for clients in the pharmaceutical, biotechnology, and healthcare industries.
- Leverage knowledge of disease trends, healthcare access, and treatment utilization across multiple therapeutic areas including oncology, rare disease, and endocrinology to develop insights that guide clients' market-access strategies, clinical development plans, and public health initiatives.
- Develop forecasting models and predictive analyses to assess the future impact of disease burden, treatment innovations, and healthcare-system dynamics.
- Provide insights into population health metrics by designing and consulting on study protocols, analyzing large health datasets, and interpreting results using advanced biostatistical methods.
- Conduct healthcare market assessments for clients' products and interventions. Synthesize both quantitative and qualitative data into comprehensive reports, white papers, value dossiers, and strategic presentations shared directly with client partners.

**Requirements:**

- Master's Degree in Epidemiology or Public Health, plus 1 year of experience in the offered position or in a life sciences consulting role. All of the required experience must have included: delivering consulting projects for pharma, biotech, and healthcare clients; leading primary and secondary research across oncology, cardiology, and ophthalmology; utilizing clinical trial databases, pipeline trackers, earnings reports, and financial filings to uncover actionable insights; using Excel, PowerPoint, SQL, Stata, Tableau, Qualtrics and PowerBI to analyze and transform healthcare data and commercial insights into actionable implications; and developing visual presentations (e.g. slide decks) for competitive landscapes, market trends, pipeline reviews, market opportunity assessments, and U.S. market access dynamics. #LI-DNI
